ALESSANDRA BURCKHALTER

Front-end Developer
Atlanta, GA | (678) 989-6131
github.com/alessandraburckhalter | linkedin.com/in/alessandraburckhalter | https://aburckhalter.netlify.app/ | ale.lptc@gmail.com

Creative and passionate front-end developer with the ability to provide elegant solutions to complex problems. As a former executive assistant, I have an eye for detail and a commitment to excellence. Having a curious mind and practicing perseverance has aided me in learning many new skills, including software development. Fluent in both Portuguese and English, and also speak intermediate/conversational Spanish.

SOFTWARE DEVELOPMENT SKILLS

- HTML, CSS, JavaScript (ES6), Python, Node.js, Express, React, jQuery, Passport, Bootstrap, RESTful API, Ajax, Postgres.

EDUCATION

DigitalCrafts | Certificate in Software Engineering | Atlanta, GA **December, 2020**
- Software engineering training program covering full-stack development: JavaScript, Python. Emphasis on frameworks: React/Redux and server-side technologies including Node.js, Express, and PostgreSQL

FATEC | A.S. in Bilingual Executive Secretary | Sao Paulo, Brazil **December, 2015**

PORTFOLIO

fetchMate **December, 2020**
https://github.com/alessandraburckhalter/fetchMate / - https://fetchmate.herokuapp.com/
- fetchMate is a project hosting application built to help programmers find team members with specific development skills.
- Users can host a new project, join current projects, chat with team members, and even comment on different projects.
- Developed by a team of 5 people. Created the website concept. Worked on the UI and managed and organized the team's tasks through Trello.
- fetchMate utilizes React, Redux, Node.js, PostgreSQL, Sequelize ORM, Material Design for Bootstrap, and Socket.io.

Happy **November, 2020**
https://github.com/alessandraburckhalter/Happy-Backend / - https://happy-pet-shelters.herokuapp.com/
- Happy is a solo project created to help the community find animal shelters through a simple, dynamic and responsive graphic interface.
- The goal is to get people in contact with the shelters and adopt a little animal. In addition to viewing information about the shelters, the user can register a new one to help the platform grow.
- It was developed with React, Node.js, Postgres and Express.

What's Your Flavorite **September, 2020**
https://github.com/alessandraburckhalter/Whats-Your-Flavorite01
- What's Your Flavorite is a responsive website that lets users to input the grocery items they have at home and collect the results of all the recipes they can make. Users can also "flavorite" and email themselves recipes of their choosing.
- Created with a team of four people. Organized team responsibilities with GitHub Projects to incorporate agile strategies into our development. Created the website concept and worked on its design.
- This application utilizes HTML, CSS, JavaScript, Bootstrap, jQuery and two different APIs.
